SUMMARY

I'm a software developer who enjoys building clean, scalable applications using Python and Django. With a solid grasp of Git and full-stack development, I aim to create reliable, maintainable code that solves real problems. I'm always curious, always learning, and passionate about turning ideas into working software.

SKILLS

Frontend: HTML, CSS, JavaScript, React, Liquid

Backend: Python, Django, Django REST Framework, JWT

Tools & Platforms: Git, Jira, Shopify, Vite, PostgreSQL, PostGIS, AWS

WORK EXPERIENCE

Shopify Developer, Vytal Brands

Nov 2024 - Present

- Aspiring Shopify Developer proficient in Liquid, HTML, CSS, and JavaScript for crafting responsive and visually compelling storefronts.
- Experienced in building customized eCommerce experiences and enhancing UI components for better usability and performance.
- Focused on delivering high-quality, scalable solutions that align with Shopify's best practices and development standards.

Backend Developer Intern, Ganjean Health

Mar 2024 - Sep 2024

- Engineered a robust Health Management API with Django REST Framework to manage appointments, prescriptions, and sensitive health data, ensuring seamless and efficient operations.
- Strengthened data security by implementing encrypted PDF generation for prescriptions, integrating django-rest-private-storage, and enforcing Role-Based Access Control (RBAC) to restrict access to authorized medical staff and administrators.
- Gained deep hands-on expertise in implementing JWT authentication, enhancing API security through token-based user verification and safeguarding critical endpoints.

EDUCATION

Bachelor of Technology (B.Tech), Information Technology

Jun 2020 - Jun 2024

Lakshmi Narain College of Technology, Bhopal

CGPA: 7.98

High School (PCM Stream)

Jan 2018 - Jan 2020

SRM Welkin Higher Secondary School Sopore

CGPA: 71.2

PROJECTS

Travel Guide app

- Full-stack application using Django REST Framework, JWT, and React.
- Integrated PostgreSQL with PostGIS for geolocation data.
- Implemented Leaflet for interactive map-based user experience.
- Users can log trips with photos, restaurants, hotels, and activity details.

Clothify Powered By Django

- Developed a responsive online store with Django backend and Bootstrap frontend.
- Enabled secure user authentication and smooth UI/UX.
- Managed tasks and ensured delivery through team collaboration.

CERTIFICATIONS

Introduction to Front-End Development – Meta (Coursera) (Completed 2024)

Complete Python Bootcamp – Udemy (Completed 2023)

AWS Academy Cloud Foundations – AWS Academy (Completed 2022)
